Contributors following along on **Github**

2300 Upvotes

Across niche **Reddit** communities

Cures Act - Dec 2022 Deadline

Information Blocking

Cannot restrict flow of information to patients

API Access

Allow patients to retrieve their records electronically

ONC Cures Act Final Rule

Interoperability

Must provide records in standardized format

Third Party Certification

Application developers are not required to be HIPAA compliant

Patients are Suffering

6 in 10
American adults have a **Chronic Condition**

$200 Billion
Is spent annually on **Unnecessary Medical Tests**

Competitors

Apple Health
- Limited to Apple ecosystem
- Focused on display, rather than analysis

OneRecord
- Centralized record under third party
- Building Data broker product

Picnic Health
- Expensive - $700/yr
- Limited data exploration

fasten

- A truly patient-centric PHR - answering questions instead of just displaying data
- Open Source, Ethical & Privacy focused -- impossible to datamine patient health
- Sharable record provides important context, better care decisions & better outcomes
